THE NORTH WEST WASTE ALLIANCE CAN OFFER A RANGE OF SOLUTIONS TO SUIT YOUR WASTE AND RECYCLING NEEDS

Pilbara Waste Management Infrastructure

The North West Waste Alliance recently launched its brand new waste recovery facility in the Karratha Industrial Area of Western Australia.

This waste handling and transfer station is designed to provide a broad range of waste minimisation, product recovery and recycling technologies, whilst simultaneously working as a regional training and development site for local indigenous and non-indigenous community members who are interested in a career within environmental services.

Specifically catering to the commercial, industrial, municipal, mining, oil and gas sectors, this facility will carry DER prescribed category licenses.

Education and Training

We understand that the key to improved levels of recycling and minimising waste contamination is through education and training. Therefore, we have developed programs to assist employees in making the correct decision when disposing of waste and recyclable material, these include:

- Pre-mobilisation induction training (materials and delivery);
- Toolbox training campaigns (provided to contractors and sub-contractors);
- Educational signage (distributed across site, crib rooms, training rooms and offices);
- Daily pre-start sessions (materials provided to contractors and subcontractors).

Waste Management and Resource Recovery Services

The North West Waste Alliance can offer a range of solutions to suit your waste and recycling needs, including:

- Skip/Marrell truck collections ranging in size from 3m³–9m³ bin sizes;
- Front-lift truck collections for 1.5m³, 3m³, 4.5m³ bin sizes;
- Rear-lift truck collections for 240L, 660L and 1100L bin sizes;
- Hook Lift truck collections with bin sizes ranging from 15m³– 30m³;
- Liquid tankers collecting industrial liquid wastes;
- Flat bed vehicles for packaged waste, collecting IBC's, drums, pallets, solid/liquid hazardous waste;
- High and ultra high pressure water jetting;
- Tank cleaning and degassing;
- Emergency spill response; and,
- Sweeping.
