Special Conditions						

## CONDITIONS OF HYDRANT USE

- 1 The hydrant shall be operated such that flows are kept as low as possible to reduce the potential for discoloured water in the immediate vicinity.
- 2 The hydrant may not be left unattended with the stand pipe attached. The applicant shall be responsible for ensuring public safety and access around the point of supply. Hydrant covers must be replaced properly.
- 3 Where indicated, the applicant may only use the hydrant in the designated location.
- 4 Water may NOT be taken from any hydrants in the Drury area – this is due to abnormally low water pressure available in that area.
- 5 The hydrant permit may be revoked at any time at the discretion of Veolia.
- 6 Unauthorised use of water from a hydrant without a Hydrant Permit will result in a minimum of the monthly Hydrant Permit fee being charged.
- 7 Any damage to the hydrant or obvious leakage must be reported immediately to Veolia (refer contact below). In the event of damage due to careless use or negligence, the applicant may be charged for the cost of repairs or replacement.
- 8 The applicant shall at all times follow the instruction of Veolia. The following person is to be referred to for assistance or direction:

Papakura Operations Coordinator Ph: (09) 295 0515
