## City of Braunschweig chooses Veolia for energy concession

**Veolia, through its subsidiary BS|Energy, has been awarded the concessions for the electricity and gas grids for the City of Braunschweig, Germany. Starting January 1, 2021, BS|Energy will ensure the safe operation of the city's electricity and gas networks for a period of 20 years and a cumulated revenue estimated at EUR 2.6 billion.**

Within the framework of the contract, awarded following a call to tender, around 500 employees will be operating more than 2,960 km of electricity network and 1,140 km gas network, to ensure the safe operation of electricity and gas networks as well as efficiency, affordability and best-in-class consumer service and convenience while respecting the highest environmental standards. Next to operation, the concession contract comprises the construction, maintenance, management engineering of the grid.

The network management includes the modernization of electricity and gas networks based on decentralized supply and neighborhood concepts, the integration of renewable energy plants and grid-side promotion of the expansion of electromobility in the city of Braunschweig. BS|Energy not only will ensure a best-value supply of electricity and gas, but will also digitize its offers and extend its use of digital media for customer interaction. Moreover, BS|ENERGY committed itself to implementing a state-of-the-art maintenance concept that includes software solutions like asset simulation. With regard to grid technology, BS|ENERGY will be developing smart grids and contributing to R&D projects focusing on power-to-X solutions which support the German energy turnaround.

Concerning its own energy consumption, BS|ENERGY will conduct regular audits and implement an energy management system to further optimize its energy efficiency. For promoting e-mobility, BS|ENERGY committed itself to invest a for the period from 2021 to 2026 for the charging infrastructure in the city of Braunschweig. Moreover, BS|ENERGY intends to increase the number of vehicles with alternative fuels (electricity, gas, and hybrid) to achieve a share of 100% as for its corporate fleet used for grid operation.

The two contracts for the electricity and gas networks have an average annual turnover of EUR 100 million for electricity and EUR 30 million for gas. The cumulated total turnover over the term of the contract amounts to approximately EUR 2.6 billion.
